Highlights

AGV forklifts (Automated Guided Vehicle) are advanced, self-operating machines designed to automate material handling tasks in warehouses and distribution centers. They excel in applications such as picking from the end of a production line and dropping items at staging areas, or retrieving goods from the floor and placing them in storage racks. With their precision navigation and efficiency, AGV forklifts optimize workflows, reduce labor costs, and enhance overall productivity in high-demand environments.

WEIGHT CAPACITY
Up to 5,500lbs.

BATTERY TYPE
LEAD ACID

NAVIGATION
LASER GUIDANCE

CHARGING TYPE
FAST CHARGE

TRAVEL CAPABILITY
BI-DIRECTIONAL

LIFT HEIGHT
Up to 110"

AGV Specifications

General Specifications

Type: Forklift Automated Guided Vehicle (AGV)
Model Name/Number: eBOTSD1240
Manufacturer: America in Motion
Operation Mode: Autonomous
Navigation Type: Laser-guided
Battery Type: Lead Acid
Battery Capacity: 48V, 380Ah
Charging Type: Fast Charging
Indoor/Outdoor Use: Indoor
Customization: Standard options available

Performance & Load Handling

Maximum Load Capacity (Max for flat surfaces only): Up to 5,500 lbs.
Load Center: 24"
Travel Capability: Bi-Directional
Standard Lift Height: Up to 110" (taller lift height options available)
Fork Length: 48"
Standard Travel Speed: 1.2 m/s
Standard Lift Speed: 6 in/sec
Mast Type: 2 stage ball screw for precision
Standard Gradient Capability: 0 deg
Turning Radius: 80"

Safety Features

Emergency Stop Button: Yes
Obstacle Detection: Yes
Safety Bumpers: Yes
Anti-collision Sensors: Yes

Interface & Control

User Interface: [Touchscreen / Button panel / Mobile app / Remote control]
Communication Protocol: [Wi-Fi / Bluetooth / Ethernet / 5G]
Software Integration: [Warehouse Management System (WMS), ERP, or other integrations]

Price & Warranty
Price Range: Contact SIE
Warranty: 1 year

Turning Radius

80"

Safety Field

Warning Field - up to 25 meters @ 40 mm object resolution

Protective Field - up to 4 meters @ 40 mm object resolution

VEHICLE QUANTITY CHART

The chart below helps determine the optimal number of AGVs needed for an operation by looking at round-trip distance and loads moved per hour. By matching these variables in the chart, you can calculate the required fleet size to meet material handling demands efficiently. For example, moving 15 loads per hour, 700 feet round trip would require 2 AGVs.

Round Trip Distance (Meters)	Round Trip Distance (Feet)	Loads/Hr.												
		10	15	20	25	30	35	40	45	50	55	60	65	70
8	25	0.2	0.3	0.3	0.4	0.5	0.6	0.7	0.8	0.9	0.9	1.0	1.1	1.2
